

Web and Application Development, Maintenance, and Operations Services

At Corbus, we understand how critical web and application uptime is to the operation of your company. We specialize in web application development, and understand your need for robust and secure applications that mobilize operations for your employees, customers or suppliers. For over 20 years, clients ranging from Fortune 50 firms to start-ups have relied on Corbus to design and implement the best web and application solutions.

The Corbus Advantage

With Corbus' Web and Application Services, our clients improve internal operations, customer and supplier relationships. Some of the ways we deliver client-centric solutions:

- Agnostic technology to complement the client's existing IT platforms
- Secure solutions that protect the client's data
- Proactive, preventative maintenance for service packs, patches and upgrades
- Scalable web applications
- Lower development and maintenance costs
- Support by the Corbus 24/7 Global Rapid Response Support Team

We maintain and upgrade your systems as business requirements change and perform daily health parameter monitoring to check for:

- Availability
- Performance
- Functional correctness
- Site compliance on privacy
- Security
- Accessibility to avoid business loss and potential legal issues

Web Application Development, Maintenance, and Operation Services

Since 1994, Corbus has been the trusted application support partner for Fortune 50 companies.

Our Web and Application Team offers a variety of service models to meet the needs of your business, consistently exceeding expectations while limiting costs. Our proven methodology follows a strict SDLC process that is complemented with agile development standards and ITIL-certified project management. We provide expert focus on your requirements by defining system functionality, integration capabilities, end-user design, security, and technology infrastructure. We are able to deliver solutions on legacy technologies, in addition to the latest programming languages like Java, .Net, Oracle, Open source PHP, Perl, and WordPress.

The Corbus Difference

- ✓ We are trusted by Fortune 50 clients, providing continuous service for over 20 years
- ✓ We have ITIL-certified resources
- ✓ We provide flexible support models to meet the needs of your business
- ✓ We provide 99% defect free delivery – inclusive of performance, security, and accessibility
- ✓ We operate globally, with 24/7 support
