ESKO✱ + CORBUS℠
A Soin Company

Bringing Esko's design software and Corbus' Packaging Artwork Management (PAM) skills together.

Do you need to integrate Esko solutions with ERP or other back-end systems? Corbus can help. We began a partnership with Esko a few years ago to provide our global clients with a total solution for their Packaging Artwork Management needs. As an Esko partner, we are experts in WebCenter (and other Esko software), reducing your time-to-market costs and implementation errors.

> "...Partnering with companies like Corbus that also have strong brand owner relationships are a force multiplier that benefits the entire ecosystem."
>
> *-Philippe Adam, Esko's Vice President of Global Marketing*

Why Corbus?

✓ Ability to train and activate organizations who have not yet implemented digital/streamlined packaging tools and software

✓ Proficient in Esko's software tools, and can get your WebCenter QuickStart, Dynamic Content, Help Desk or Artios Cad software up and running in as little as a week

✓ Supply customizable configurations that meet your company's specific needs

✓ Provide PAM solutions to well-known brands and Fortune 500 companies within various industries

✓ Offer experienced project managers, solution architects, and packaging artwork management professionals who will work with you to streamline your processes, reduce costs, and improve your overall speed-to-market

Proven PAM Results

$
Attained cost savings of 20% on artwork budgets

Liberated the design manager's time by 60%

Freed the marketing team's time by 15%

Improved speed-to-market by 20%

Achieved 30% cost savings on production budgets

WebCenter: Help Desk Support

Do your employees, agencies, or vendors continually face challenges when utilizing WebCenter or other Esko software? If so, we can help. Our experienced and professional solution architects can provide technical support across a variety of ticketing systems to help respond and resolve user errors and issues. Let us be your preferred Packaging Artwork Management consultants and software integrators..

WebCenter: QuickStart

QuickStart is simple to use and provides clear tasks, designated ownership, visual reporting, and interactive dashboards allowing for a powerful 360° view of your work throughout the packaging design process. It also streamlines the approval process and enables you to work quicker and more effectively.

Packaging Prepress: Automation Engine

Automation Engine has the ability to speed up your prepress operations. This tool is sure to become the heart and soul of your workflow tasks. The solution was built to give you extensive oversight, control, and integration abilities. Ultimately, this solution will increase your product's quality while reducing common packaging flaws and decreasing costs.

Packaging Prepress: Dynamic Content

As a software plugin, Dynamic Content provides superior dynamic content functionality while enabling your team to conduct, edit, and maintain copy management outside of Adobe® Illustrator®.

Packaging Design: ArtiosCAD

ArtiosCAD is a truly extraordinary structural design software created specifically for all of your packaging design needs. The software is known for providing industry professionals with support for product development, virtual prototyping, and manufacturing.

Who Is Corbus?

With our global headquarters located just outside of Dayton, Ohio, we are a privately owned and certified Minority Business Enterprise (MBE) that offers Business Process Management and Supply Chain services. In addition to our offices in the United States, we also have employees in over 20 countries including Singapore, China, Japan, India, Switzerland, and Panama. Our geographically diverse employees allow us to do business just about anywhere in the world.
